Vincent BESANÇON

System Engineer
Montbéliard

Hey !

Passion for Linux and Open source in general. My focus is now on containerized workloads with Docker / k8s. Eaten by a Python ♥.

Training - Kubernetes
2018
Ambient-IT

Training - Private Cloud, mise en oeuvre avec OpenStack
2017
Orsys

Training - Docker, créer et administrer vos conteneurs virtuels d'applications
2016
Orsys

Training - AngularJS, maîtriser le Framework JavaScript de Google
2014
Orsys

Training - Python, programmation objet
2013
Orsys

Training - Programmation en C#: Travaux pratiques
2010
Learning Tree

Training - Programmation Java: Travaux pratiques
2008
Learning Tree

2y Technical IT
September 2001 - July 2003
Université de Franche-Comté

Bachelor Degree
September 1999 - July 2001
Lycée Jules Viette

<> Projects

docker-ttrss
Docker image
Tiny Tiny RSS as a Docker container.
https://github.com/nVentiveUX/docker-ttrss

monitoring.nagios
Python
Build fast 🚀 new plugins for Nagios using Python.
https://github.com/bigbrozer/monitoring.nagios

netdata-rpm-builder
Docker image
Build RPMs for Netdata, the distributed real-time performance
and health monitoring system.
https://github.com/bigbrozer/netdata-rpm-builder

atom-aligner-puppet
CoffeeScript
Puppet support for atom-aligner plugin within Atom editor.
https://github.com/bigbrozer/atom-aligner-puppet

netplugins
Python
Collection of various networking plugins for Nagios.
https://github.com/bigbrozer/netplugins

✅ Skills

Linux   Kubernetes   Docker   Python   Bash
Nagios   HTML/CSS   JavaScript [ES6]   API REST
Godot Engine   SDL   PyGame
